### COMMENTS:

I believe transportation and burial of high level nuclear waste at the Yucca Mtn repository to be not only inevitable, but may be profitable for the citizens of Nevada.

However, guarantees and assurances of safety are paramount in the minds of all Nevadans and citizens of other states through which the waste must pass.

Especially for those citizens who may lose property due to right of way condemnation and degradation of ability to use their property must be properly reimbursed, not at condemnation prices usually used, but at commercial values on open market.

Please note: Your comment(s) must be received by the Department of Energy by June 1, 2004 to be considered. Comments received after the close of the comment period will be considered to the extent practicable.

If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so the address and postage-paid notice are visible, then secure with tape.

Please feel free to attach additional pages (if mailing, more postage may be needed).
